Awesome game. If you have played iBomber games before than you know what you can expect from the graphics side of things. The gameplay is a lot different however. You're not the blowing up things as in a tower defense game, but you're now in the driverseat. The game has some depth that you will be able to upgrade you're tank. For the rest it's making sure you hit the enemy with you gun. Wouldn't put this game at the top of my shopping list, but it definety offers some simple good old fun.. Excellent game. More than wort the small price.. Great game, highly recommended!. Deserves respect; Has a GTA2 feel to it. its ok when it plays smoothly as it randomly drops to 5fps or so for extended periods on a high end pc.

controls are weird, they just tell it which way on screen to go, you dont have control over turning or forwards/backwards, so you get stuck in corners easily and regularly..

♥♥♥♥♥♥♥♥♥♥GOOD

iBomber

25Play

89. Just go ahead and buy it.. Great game, can only play ONCE, literally once, you are unable to start a new game, i've tried uninstalling, some people have had to format their PC (No idea why the heck they'd do that), so over all, not happy.

A pretty fun game to play to kill some time with. Alot better than youtube i say lol. DO NOT DOWNLOAD FOR WINDOWS

So far [17.05.2014], the Game doesn't run on most Windows and the developpers appear to have abandoned ship, despite the "Game does not run" thread in the discussions-section.

I have not yet had the chance of trying it out and therefore can not rate the gameplay.

To the developpers: Please get more to run than only the process in the TaskManager. Szerethető kis játék.. This is a perfect little game. If you're looking for a casual game that you really don't have to put your mind into too much - this is your choice. You can play the game through by being sloppy and straight-forward or if you're up to it you can go all-perfect on it. I have put somewhat twelve hours into this game and that was just the single-player campaign - with all Steam achievements collected, though. The game offers some replay value by giving you an arcade challenge mode, too.. Just go ahead and buy it.. I expected a mobile game with little no depth. The opening menu and options are very mobile like, but don't let that full you. This game is pretty great. It plops you on a large map with non-linear objectives. If you like mindless shooting, this game will be great for you.. Be a single Sherman, rushing behind enemy lines, destroying everything you possibly can in this top-down twin-stick shooter. No controller? No problem. Keyboard and mouse support is also available. Make your way through a handful of maps with various objectives to destroy (you don't capture anything in this one, folks) while collecting gold and secrets for upgrades to beef up your tank of doom. Make enough money and you will become a motorized wagon of death!

That being said, the game feels lacking. There's plenty of content in the form of upgrades and unlockables, but it generally isn't a whole lot of fun. I can't pinpoint it either. This kind of game is normally up my alley, but I think what kills it is pacing and sound design. Good sound design would have gone a long way to helping this game feel tremendous, but as it is, you might as well have themed this with toys and got the same effect. I won't thumb the game down, but as far as twin-stick shooters go, it's very basic and not very engaging. YMMV.

Note: This game won't properly run in fullscreen for inexplicable reasons so you will have to play it windowed to make it run smooth, even if your PC can render the power of all the angels in real time at 4K.. Not a tower defense game like the original.. "Bomber Attack" is similar to something you would have seen on a Flash games arcade site back in Flash Player's glory days and performs about as slowly in fullscreen. Windowed mode makes the game run a lot more smoothly and even slightly faster, making the game a slight bit more challenging... though it's easy to win no matter what (at least in the early levels). I quit after only a few minutes because the game simply didn't hold my attention. The game mechanics weren't designed in favor of the AI, making you, the player, way too overpowered. I also didn't like the theme or setting of the game, but that's most just personal preference. Overall, it's just too boring to recommend at any price, but if you want something like this, you're not going to let me stop you.
